MINERAL AGRIBUSINESS COMPANY

# Company Profile

**PT MANGGHALA INATAMA LENTERA**

A provider of agricultural mineral solutions — Dolomite, Natural Phosphate, Natural Potassium (Palm Bunch Ash), and Clay — for shrimp farms, plantations, fertilizer producers, and livestock farms across Indonesia.

MESSAGE FROM THE PRESIDENT DIRECTOR

# Welcome to PT. Mangghala Inatama Lentera

“

Since our founding, we have been dedicated to being a trusted partner for farmers and agribusiness players, from the national to the international scale. We believe that fertile soil and healthy crops are the foundation of sustainable food security, for the sake of our shared future.

As a company focused on the fertilizer industry, PT. Mangghala Inatama Lentera continues to innovate in formulating high-quality plant nutrition products. By combining modern technology with in-depth agricultural research, every product we make is designed to maximize yields, improve soil nutrition, and preserve the environment.

In this profile, we present a comprehensive overview of our commitment, product lines, and the values that underpin our business. We extend our deepest appreciation to all partners, customers, and stakeholders who continue to walk alongside us.

We are ready to keep contributing actively to the advancement of agriculture and the welfare of farmers, especially Indonesian farmers.

Warm regards,

**Muhammad Faiz A. H.**
President Director, PT. Mangghala Inatama Lentera

ABOUT US

# Our History & Journey

Our company was founded in 2016 in Surabaya with a simple vision: to provide quality plant nutrition solutions, support sustainable agriculture, and produce crops that are safe to consume. Starting as a supplier of natural fertilizer raw materials, we went on to open a small-scale production facility to serve export markets.

As trust from overseas agribusinesses grew, we expanded production capacity and formulation research for Natural Phosphate Fertilizer, Natural Potassium Fertilizer, and Dolomite Soil Conditioner, backed by a rigorous quality control laboratory. We now aim to bring our globally proven products to the local market, so Indonesian farmers can use the same quality relied on internationally.

## MILESTONE

**2016**
Company founded, starting Dolomite Soil Conditioner production for overseas markets and supplying Natural Phosphate raw material to local manufacturers.

**2017**
Partnered with small-scale fertilizer manufacturers to produce Natural Phosphate Fertilizer and sell directly to overseas buyers.

**2020**
Built our first production facility for Natural Phosphate Fertilizer.

**2021**
Launched our first Dolomite Soil Conditioner brand for the local market.

**2024**
Expanded production of Natural Potassium Fertilizer made from Palm Bunch Ash.

**2026**
Built our first production facilities for Dolomite Soil Conditioner and Clay Binder.

## VISION

**To be a leading natural fertilizer producer in the global market, supporting sustainable world agriculture through high-quality, eco-friendly, food-safe products that meet international standards.**

## MISSION

1. Develop high-quality natural fertilizers that meet international regulatory and certification standards.
2. Promote sustainable farming by providing soil nutrition that restores land fertility.
3. Produce fertilizers with very low levels of chemicals and other harmful substances, so harvests are safe to consume.
4. Apply modern processing technology and formulation research to create efficient, high value-added fertilizer formulas.
5. Build a strong global distribution network and strategic partnerships with distributors and agricultural players worldwide.

OUR PRODUCTS

TESTED BY IDSurvey

# Dolomite

Dolomite is a carbonate mineral that supplies Magnesium (Mg) and Calcium (Ca), sourced directly from deposits in East Java and processed into powder, granule, and chips to suit industry needs.

## Powder
SUCOFINDO COA · E13103

- Mesh 60–80: moisture 6–15%
- Mesh 100–325: moisture < 3%
- CaO 31.74% · MgO 22.30%
- Neutralizing value 103.26%

## Granule
SPECIFICATIONS

- Size 2–5 mm
- CaO min 29% · MgO min 18%
- Moisture < 6%
- Crushing strength ≥ 1 kg

## Chip
SPECIFICATIONS

- Size 3–10 mm
- CaO ±30% · MgO ±20%
- Moisture < 5%
- $Al_2O_3 + Fe_2O_3$ max 3%

### KEY APPLICATIONS

Shrimp Farming & Aquaculture · Plantations & Fertilizer · Livestock & Animal Feed

### AVAILABLE PACKAGING

- 25 kg Bag
- 50 kg Bag
- 1-Ton Jumbo Bag

# Natural Phosphate
## (Guano Phosphate)

Natural Phosphate (Guano Phosphate) is a natural source of Phosphorus (P) from Indonesian guano deposits, serving as an alternative to imported phosphate as a raw material for SP-36/NPK fertilizers or for direct application on acidic soils.

### Powder — SPECIFICATIONS

- Mesh 60–80: moisture 6–15%
- Mesh 100–325: moisture < 3%
- $P_2O_5$ 10–25%
- Citric acid soluble 16–18% (at 25% $P_2O_5$)
- $Fe_2O_3 + Al_2O_3$ max 3%

### Granule — SPECIFICATIONS

- Size 2–5 mm
- $P_2O_5$ 10–25%
- Citric acid soluble 16–18% (at 25% $P_2O_5$)
- $Fe_2O_3 + Al_2O_3$ max 3%
- Moisture < 6%
- Crushing strength ≥ 1 kg

### KEY APPLICATIONS

- Plantations & Fertilizer
- Shrimp Farming & Aquaculture
- Livestock & Animal Feed

### AVAILABLE PACKAGING

- 25 kg Bag
- 50 kg Bag
- 1-Ton Jumbo Bag

# Natural Potassium
## (Palm Bunch Ash)

Natural Potassium (Palm Bunch Ash) is a natural Potassium (K) source made from empty oil palm fruit bunch ash, serving as a partial replacement for KCl and a neutralizer for acidic plantation soils.

### Powder — SPECIFICATIONS

- Mesh 60–80: moisture 6–15%
- Mesh 100–325: moisture < 3%
- $K_2O$ 25–38%
- pH 10–12

### Granule — SPECIFICATIONS

- Size 2–5 mm
- $K_2O$ 25–35%
- Moisture < 6%
- Crushing strength ≥ 1.5 kg

### KEY APPLICATIONS

Plantations & Fertilizer

### AVAILABLE PACKAGING

- 25 kg Bag
- 50 kg Bag
- 1–Ton Jumbo Bag

# Clay

White Clay | Red Clay | Brown Clay

Clay is a clay mineral with high binding strength, used as a binder for animal feed pellets and granular fertilizers, as well as in drilling mud.

## Powder

SPECIFICATIONS · REFERENCE COA M07767

- Mesh 60–80: moisture 6–15%
- Mesh 100–325: moisture < 3%
- $Fe_2O_3$ 5.59%
- $SiO_2$ 51.00%
- $Al_2O_3$ 20.72%

### KEY APPLICATIONS

Plantations & Fertilizer | Livestock & Animal Feed

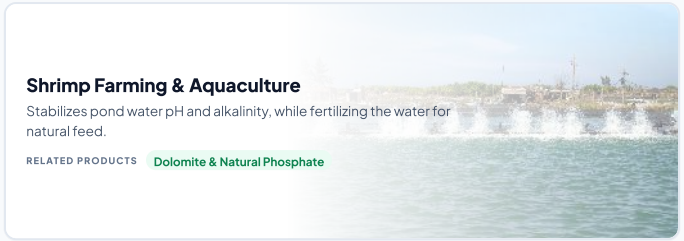

### AVAILABLE PACKAGING

- 25 kg Bag
- 50 kg Bag
- 1-Ton Jumbo Bag

PRODUCT SEGMENTATION

# Ideal For

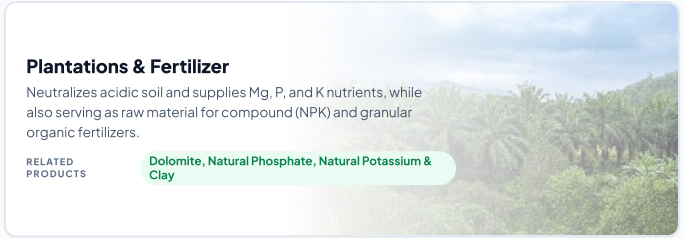

Three industry segments we can fully serve today with our production capability of 60–325 mesh powder and 2–5 mm granules.

## Shrimp Farming & Aquaculture

Stabilizes pond water pH and alkalinity, while fertilizing the water for natural feed.

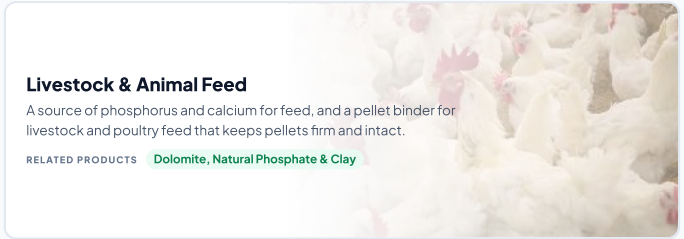

RELATED PRODUCTS Dolomite & Natural Phosphate

## Plantations & Fertilizer

Neutralizes acidic soil and supplies Mg, P, and K nutrients, while also serving as raw material for compound (NPK) and granular organic fertilizers.

RELATED PRODUCTS Dolomite, Natural Phosphate, Natural Potassium & Clay

## Livestock & Animal Feed

A source of phosphorus and calcium for feed, and a pellet binder for livestock and poultry feed that keeps pellets firm and intact.

RELATED PRODUCTS Dolomite, Natural Phosphate & Clay

PRODUCT USES

# Agriculture & Plantations

Most Indonesian farmland is acidic. Our mineral combination repairs the soil while supplying key plant nutrients.

HOW IT WORKS
Neutralizes acidic soil pH and adds Ca & Mg.

OUTCOME
**More available nutrients, greener leaves, more efficient NPK.**

HOW IT WORKS
Supplies phosphorus gradually (slow release).

OUTCOME
**Strong roots, uniform flowering and fruiting, higher yields.**

HOW IT WORKS
Adds high potassium (K) from a natural source.

OUTCOME
**Heavier fruit, higher palm oil yield, drought-resilient plants.**

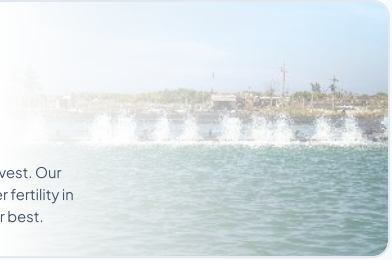

HOW IT WORKS
Improves water and nutrient retention in sandy soil.

OUTCOME
**Fertilizer stays put and plants stay fresh in dry spells.**

PRODUCT USES

# Fisheries & Aquaculture

Water quality is the key to a good harvest. Our minerals keep pH, alkalinity, and water fertility in check so shrimp and fish grow at their best.

HOW IT WORKS
Raises and stabilizes pond water and bottom pH and alkalinity.

OUTCOME
**Less stressed shrimp, smooth molting, faster shell hardening, higher survival rate (SR).**

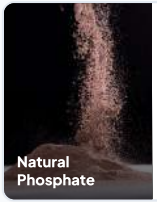

HOW IT WORKS
Supplies dissolved Ca & Mg needed to build the shell.

OUTCOME
**Faster growth and more uniform harvest size.**

HOW IT WORKS
Fertilizes water to grow phytoplankton.

OUTCOME
**Stable water color and plenty of natural feed, more efficient feed use (FCR).**

PRODUCT USES

# Livestock & Animal Feed

Feed-grade minerals for livestock health, productivity, and feed pellet quality.

HOW IT WORKS
Phosphorus & calcium source in feed rations.
OUTCOME
**Strong bones, optimal growth, thicker eggshells.**

HOW IT WORKS
Ca & Mg supplement for livestock and poultry feed.
OUTCOME
**Prevents mineral deficiency, keeps livestock productive.**

HOW IT WORKS
Applied to coop bedding to help absorb moisture.
OUTCOME
**Drier bedding, reduced coop odors.**

HOW IT WORKS
Helps keep coop bedding dry and clean.
OUTCOME
**Helps reduce flies and limit bacterial growth.**

HOW IT WORKS
Feed pellet binder.
OUTCOME
**Pellets hold together, less feed waste.**

OUR ADVANTAGES

# Why Mahitala

### End-to-End Process

Every stage, from raw material sourcing to ready-to-ship product, is managed in a single flow for more reliable supply.

### Logistics Control

Backed by our own trucking fleet and partnerships with several freight forwarders, keeping domestic and export schedules predictable and franco (delivered) pricing competitive.

### Powder & Granule

Production capability of 60–325 mesh powder and 2–5 mm granules for a wide range of industrial needs.

### Controlled Quality

Sampling and blending SOPs keep quality consistent in every shipment.

### Competitive Pricing

A lean supply chain from source to buyer.

### Minimal Chemicals

Our processing uses very few chemicals.

### In-House Laboratory

Every product is quality-checked in our own laboratory under strict QC.

### Minimal Contamination

Handling from raw material to packaging is controlled to keep contamination to a minimum.

The combination of an end-to-end process, logistics control, and powder & granule production capability allows Mahitala to offer competitive franco (delivered) prices with consistent quality.

FROM MINE TO SHIPMENT

# Production Process

### Raw Material Sourcing

Raw materials come from our own sources: our own dolomite and natural phosphate mines, and palm bunch ash from our own incinerator.

### Milling

Ground into 60–325 mesh powder to buyer specifications.

### Granulation

Powder is formed into 2–5 mm granules, then dried to the required hardness and moisture specifications.

### Quality Control

Representative sampling of every lot and laboratory testing to ensure the promised quality.

### Packaging

Packed in 25 kg bags, 50 kg bags, or 1-ton jumbo bags as required.

### Shipping

Delivered by dump truck fleet (domestic) or consolidated in containers for export.
